

For Immediate Release:  
November 28, 2018

### **Fab Lab Open House**

The School District of Altoona Fab Lab will open its doors to the parents, students and the community at large tomorrow night, November 28, 5:00 – 7:00 pm.

Participants at the Fab Lab Open House, 4th grade or older, will have the opportunity to create a laser engraved picture keepsake – and guests of all ages are welcome to just come and explore the facility!

“Mark your calendar for tomorrow night, 5:00-7:00 pm. You don’t want to miss our Fab Lab Open House. This event represents a cooperative effort between school district staff and Jamf employees. The project is funded by many area generous sponsors that will be recognized at the event. Everyone is welcome and many will walk away with a memento from using these state-of-the-art technology tools,” said Dr. Ronald Walsh, Interim Superintendent.

The Altoona Fab Lab is a project-based learning environment designed to provide students with the capacities to create products and develop skills that will propel them into the skilled work force of the 21st Century!

**ALTOONA  
FAB LAB  
OPEN HOUSE**

Thursday | Nov. 29 | 5pm to 7pm

**Explore the FAB  
LAB and create a  
laser engraved picture  
keepsake!**

*The Fab Lab is located in the Altoona Intermediate/Middle School building, at 1903 Bartlett Avenue*

If you go: Participants should bring a digital photo to the event (must be in 4th grade or older to participate in the project).
