

ADMINISTERING MEDICATIONS TO STUDENTS

453.4

Medications should be administered to school children at home, rather than at school, whenever possible. School personnel who are authorized to do so by the school nurse may administer medications to students under the procedures and conditions established in this policy.

The school nurse shall be responsible for overseeing the receipt of the written medication instructions and consents, the maintenance of complete and accurate medication administration records, the proper storage of medications, and the disposal of outdated and unused medications in accordance with District procedures.

No school personnel, other than a healthcare professional, shall be involuntarily required to administer any medication to a student by any means other than ingestion. Authorized school personnel who voluntarily agree to administer a prescription drug or nonprescription drug product that must be injected into a student, inhaled by a student, rectally administered to a student, or administered into a nasogastric, gastrostomy or jejunostomy tube shall complete all state-mandated and District-required training before administering medication to a student through such means.

Students may possess (carry) and use an inhaler or epinephrine auto-injector (e.g., Epipen®) with the written approval of the student's physician and parent or guardian.

No District policy or procedure shall be interpreted to limit or detract from the immunities and other limitations on liability available under the law to nurses and other persons who engage in or assist with the administration of medication to students.
